

KALOYAN KORAVSKI

FRONT END DEVELOPER

PROFILE

Creative hardworking front end developer skilled at creating a unique customer experience that highlights brand messaging. With over eight years as a front end developer and over four years of working on Shopify projects, I love challenges and solving them by using simple and scalable solutions. I'm passionate about new technologies and trends.

Attention to detail is a skill I achieved after years of practice and thanks to my experience in graphic and web design. Now, as a developer this helps me to find issues faster and to produce high-quality work.
